<sup>◆</sup> Indicates objectives and targets identified in *Healthy Arizona 2010*.

Notes: The rates of hepatitis A, meningococcal disease, and tuberculosis are per 100,000 persons. (Source: Arizona Department of Health Services, Bureau of Epidemiology and Disease Control Services, Office of Infectious Disease Services, Infectious Disease Epidemiology Section). Except the age-specific mortality rates for suicide, all mortality rates are adjusted to the 2000 standard population and expressed per 100,000 population. The rates based on fewer than 10 cases are not statistically reliable. See Tables 5E-12, 5E-28 and 5F-1 for the numerators.
